

Information

Determining the file format and finished size

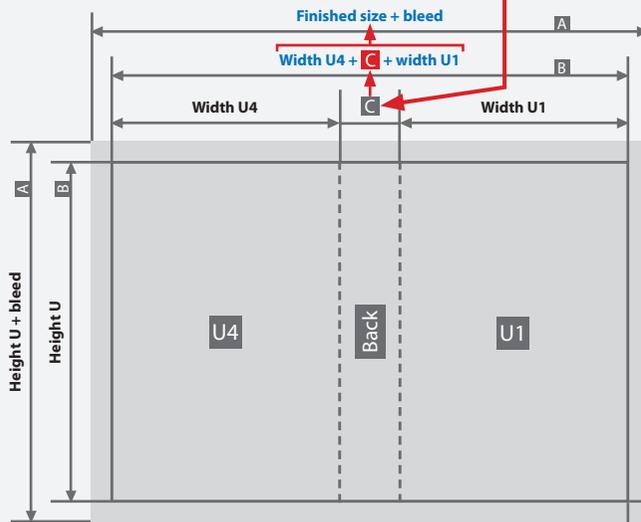

Number of pages (incl. cover)	Material interior		
	Paper weight (e.g. 90 gsm silk)	Paper weight (e.g. 135 gsm glossy)	Paper weight (e.g. 170 gsm silk)
	Spine thickness		
30	-	-	3.0 mm
34	-	-	3.0 mm
38	-	3.0 mm	3.0 mm
42	-	3.0 mm	3.5 mm
46	3.0 mm	3.5 mm	3.5 mm
50	3.0 mm	3.5 mm	3.5 mm
54	3.5 mm	4.5 mm	4.0 mm
58	3.5 mm	4.5 mm	4.0 mm
62	4.5 mm	C 5.0 mm	4.0 mm
66	4.5 mm	5.0 mm	4.5 mm
70	5.0 mm	5.5 mm	4.5 mm
74	5.0 mm	5.5 mm	4.5 mm
78	5.5 mm	6.5 mm	5.0 mm
82	5.5 mm	6.5 mm	5.0 mm
...

EXAMPLE:
The **paper weight** 135 gsm glossy and the **total number of 62 pages** result in a **spine thickness C** of **5.0 mm**, as can be seen on the chart.

Calculation: Width file format A
305 mm + 6 mm = **311 mm**

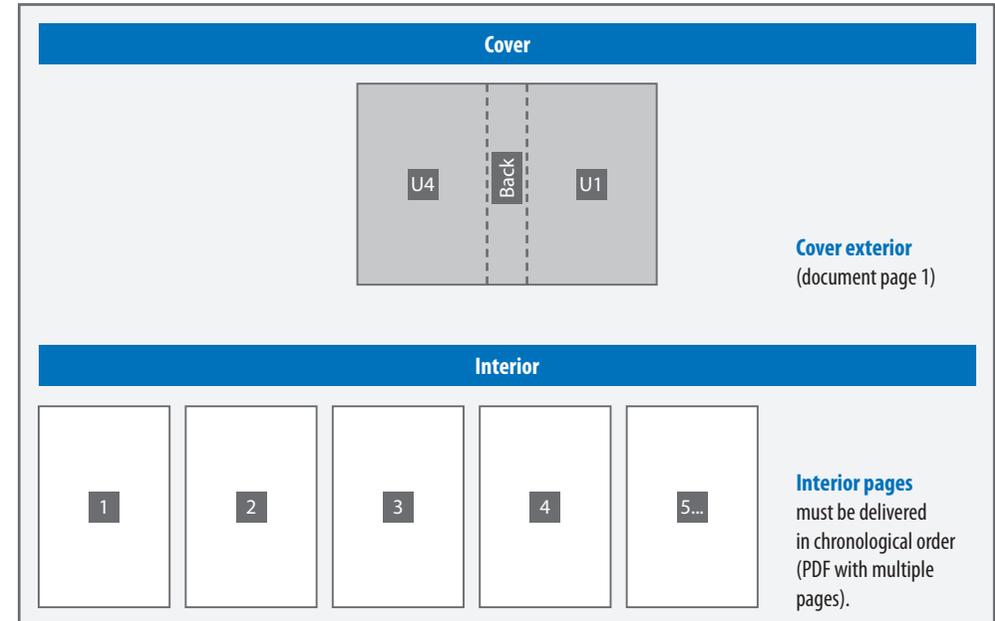

Calculation: Width finished size B
150 mm + **5 mm** + 150 mm = **305 mm**

The exemplary chart and layout use fictitious numerical values!

The **spine thickness C** of this product varies depending on the total number of pages. Therefore, the spine thickness must be used to calculate the print data (file format). To calculate the **file format and finished size** of your cover pages, consult the chart to determine the necessary dimensions of the **spine thickness C** (see last PDF page).

Print files

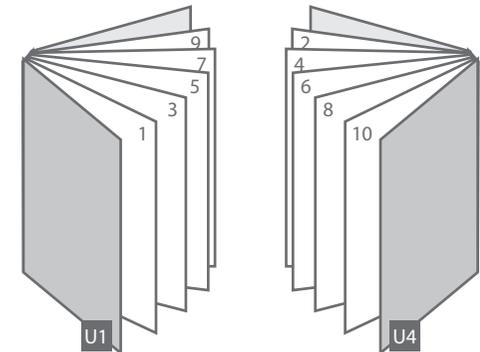

Please deliver two print files:

Cover: 1 document page

Interior: multiple pages

Finished product

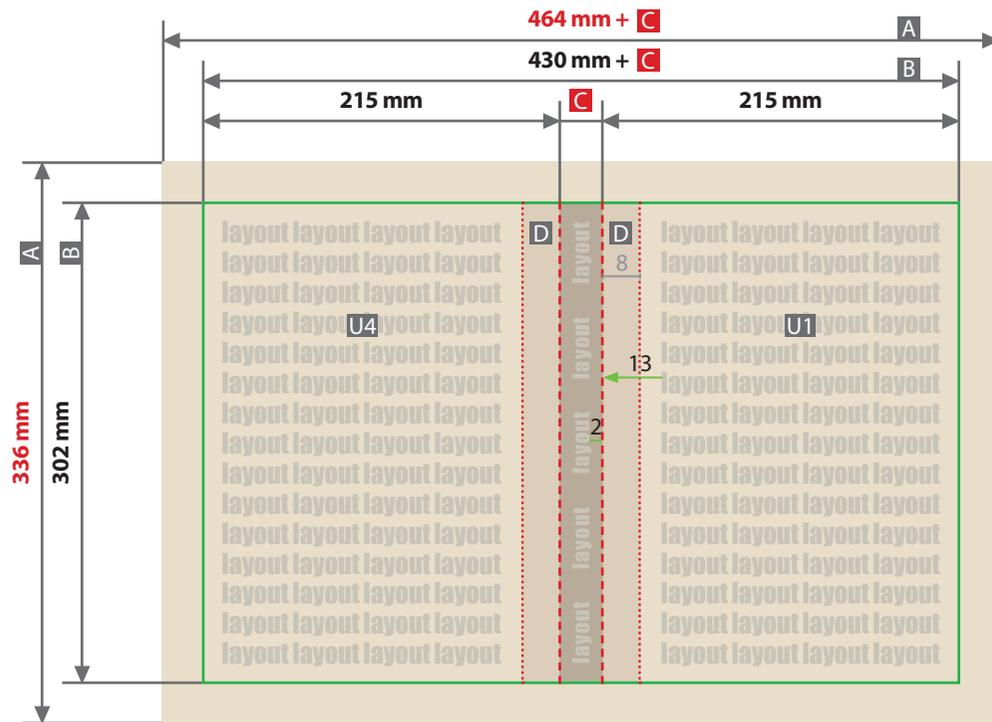

We create your finished product from the two print files (cover and interior) delivered by you.

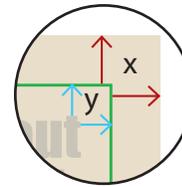

Hard back perfect binding

A4, format portrait, left side binding

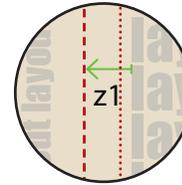

Document page 1: Cover – exterior

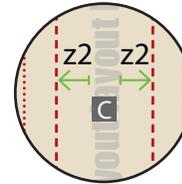

Folded final format
215 x 302 mm

Bleed (x)
17 mm
Safety distance (y)
5 mm

Safety distance spine (z1)
13 mm from back to title

Safety distance spine (z2)
2 mm to back and title

- A = File format
- B = Final format
- C = Spine width: the measurement can be found the chart below.
- D = Crease
- U1 = Cover front
- U4 = Cover back

Please deliver two print files

Cover: single side
U4 + C + U1 = **one** document page

Inner part: multiple pages

BEWARE

The end pages are part of the cover and cannot be printed (unprinted, white).
Do not create end pages in your print file.

Data delivery

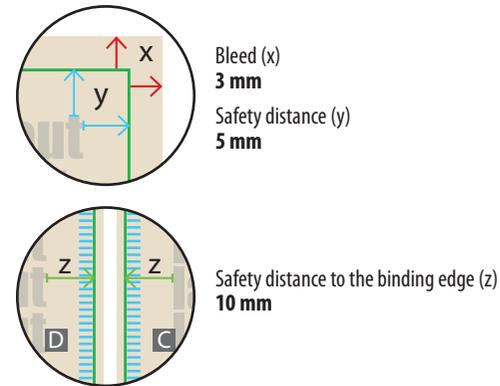

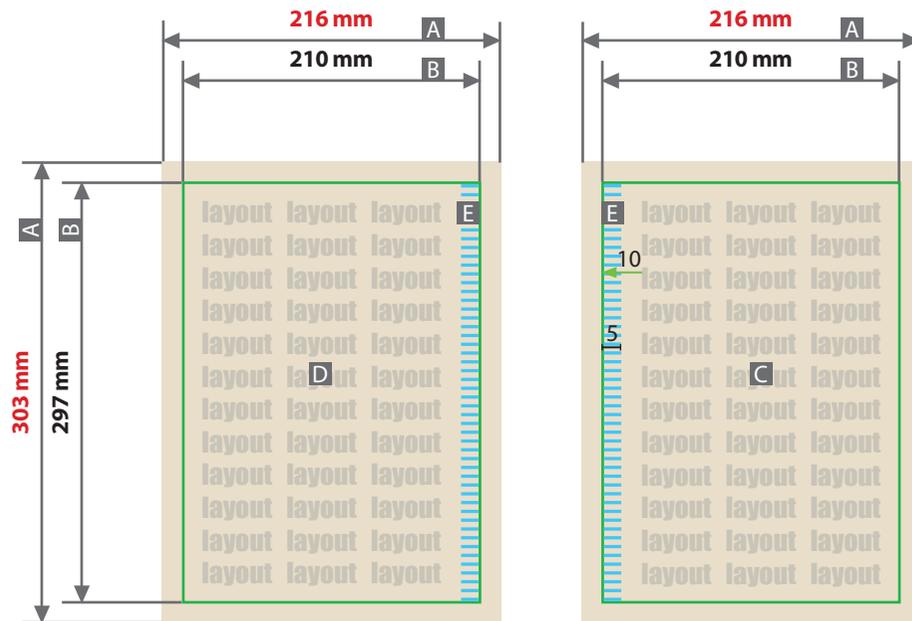

- PDF-file, single side
- CMYK colour space, ISO coated v2 300% output profile
- Image resolution: 300 ppi minimum

Please create backgrounds and images with edges up to the edge of the data format in order to avoid white borders.

Adhesive binding

A4, format portrait, left side binding

Inner part

- A = File format
- B = Final format
- C = Right side
- D = Left side
- E = Glued, non-visible area
Apply background only!

Print file 2

Interior: multiple pages

Number of pages

The selected number of pages (including cover), **excluding the 4 pages for the cover** is the **number of inner pages**. Regardless of whether the cover can be printed in a 4/0 single sided print or 4/4 double sided print the cover always has **4 pages**.

Example:
Number of pages 100 - 4 cover pages = 96 pages.

Interior pages

- Interior begins with a right page (C)
- Interior ends with a left page (D)
- Deliver pages in chronological order
- If there are empty (white) pages, these need to be included in the print file.

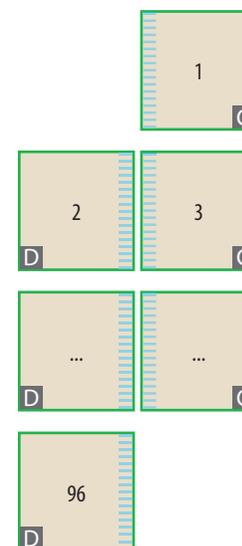

Glued area (E)

Due to the perfect binding, 5 mm of the layout space is not visible in the binding.

Data delivery

- PDF file, multiple pages
- CMYK colour space, ISO coated v2 300% output profile
- Image resolution: 300 ppi minimum

Please create backgrounds and images with edges up to the edge of the data format in order to avoid white borders.

Spine width, adhesive binding, hardcover, offset print
